

Notice of Oral *Ex Parte* Presentation

June 8, 2006

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, DC 20554

Re: In the Matter of
Unlicensed Operation in the 3650-3700 MHz, ET Docket No. 04-151;
Additional Spectrum for Unlicensed Devices Below 900 MHz and the 3
GHz Band, ET Docket No. 02-380; and
Amendment of the Commission's Rules With Regard to the 3650-3700
MHz Government Transfer Band, ET Docket No. 98-237.

Dear Ms. Dortch:

On June 8, 2006, Peter Pitsch of Intel met by telephone with Barry Ohlson, senior legal advisor to Commissioner Jonathan Adelstein, regarding the above proceeding.

In the course of the meeting, Mr. Pitsch expressed Intel's continuing concern that the 3650 to 3700 MHz spectrum, especially in the affected major markets, should be licensed on an exclusive basis to foster efficient use of this spectrum for long range applications. He stated that the best way to foster long range, wireless broadband deployment in areas where congestion is likely is to provide the protection for QoS and business certainty afforded by

exclusivity. He said that a contention protocol could not enable high QoS for long range services in congested areas. Therefore, the rules under reconsideration in this proceeding would foreclose the likelihood of this valuable use.

Pursuant to Section 1.1206 of the Commission's Rules, 47 C.F.R. § 1.1206, a copy of this submission is being provided to each of the above parties. Please contact the undersigned with any questions in connection with this filing.

Respectfully submitted,

/s/ Peter K. Pitsch

Peter K. Pitsch
Intel Corporation
Director, Communications Policy
